1. Login to the system <http://linuxapps.fttl.ten.fujitsu.com>

The screenshot shows the Fujitsu Ten web application interface. The left sidebar contains a menu with the following items: Common, Accounting & Finance, Assembly Production, EH&S, Human Resource & Administration, Information Technology System, Logistics (highlighted with a red box and a yellow circle with the number 1), Manufacturing Engineering, Preventive Maintenance and Facility, Production Planning & Material Control, Purchasing, and SMT Production. The main content area is titled 'Project' and displays four tiles: 'GENERATEDN' (Trial Test: Generate DN From IMCT), 'GENERATE GMDN' (Trial Test: Generate DN From GM), 'FGCOMPAREREPORT' (Trial Test: FG Compare Report), and 'Process lead time' (Trial Test: Process lead time reduce for issue invoice (TMT)). A red box and a yellow circle with the number 2 highlight the 'EBS Report' tile, which is labeled 'Generate order for EBS system'. Below the tiles, a preview of the 'EBS Report' is shown, displaying a table of data and a summary box with the text 'Detail :: Generate order for EBS system' and 'Developer :: Naruemon(1972)'.

The rows of original file does not match with the rows of system generate
81 <> 80

Example is Isuzu.

This case for check after the system generate new format but Summary of all record are unequal with original file. For example Original data have 81 but after generate have 80, It's wrong. User must cancel and inform administrator for investigate.
